Vision Lunar – Phase One (2006-2009)

After Vision Lunar broke up in early 2009, Alexandre Julien had no intention of ever looking back on his atmospheric black metal solo project. But in August of 2010 some fans made it clear that a proper farewell was needed. And so came “Phase One (2006-2009)”, a complete discography of Vision Lunar. The compilation was released by Mortification Records on October 6th of 2010, in an extremely limited edition CD-R (five copies to be exact), and were all autographed and given away to Alexandre’s close friends. But Alexandre wanted everyone to have access to it so Mortification Records set up the compilation for free download. It has since been downloaded over four hundred times.

Now in August of 2015, Alexandre Julien has announced that Vision Lunar is back. It is the perfect time for this compilation to be reissued with upgraded artwork, new tracklisting (adding a song that was found in 2014 and fixing the names of a couple of songs) and all the songs in proper chronological order. This new pressing is also extremely limited; only ten copies will be made at a time. There is no guarantee that more than the original ten will be printed. Each are also autographed by Alexandre Julien. This is simply a way for die-hard fans to finally have access to a Vision Lunar CD.
