

Abridged Pause Recordings releases Soufferance's album "Memories of a City"

After three years sitting in Alexandre Julien's "vault" (because the hope of seeing this out had been abandoned) Abridged Pause Recordings finally unveils Soufferance's anticipated third album "Memories of a City". Years ago this album was completely lost to a computer failure. Then a great series of misfortunes happened, which you can read more about in the "Memories of a City" release page. Finally, the forty minutes of dark ambiance, which is under its own genre, "Artbient", is getting released by Abridged Pause Recordings.
