Beyond the Dune Sea’s debut album is now out

Abridged Pause Recordings introduces its two newest releases! Beyond the Dune Sea and Vision Éternel are now fully active artists on the Abridged Pause Recordings roster. We really hope that you will take a bit of your time to check them out because these bands have been hard at work lately and they deserve new ears. That’s why we would also appreciate any word-of-mouth you can do for the bands and the label! Because without fans, the music industry would be nothing. Let’s keep the indie scene alive! Vinyls should be coming on Abridged Pause Recordings this summer!

Abridged Pause Recordings has been in close contact with Adam Kennedy since the very beginning. So when he showed us his new band, Beyond the Dune Sea, we knew almost before hand that we were up for a treat. After listening to the album a couple of times, we realized that this was a brilliant album and practically begged him to let us release it. We wanted to get more people to hear this! There was barely any questions asked and it was quickly agreed. We have high hopes for this band and they should start playing some shows very soon. Keep a look out because you don’t want to miss out on this band live!

Beyond the Dune Sea’s self-titled debut full length is a brilliant album. And it was done in such a “post-musical” style as well. A series of live jams were recorded and the whole thing was put together in post-production style by Adam Kennedy. The entire album is flawless and could be your next album on repeat once you get started. This is not to be passed by in 2010.
