Canadian Various Artists Compilations

Since this blog mainly concentrates on band and label posts, I found it hard to include various artists compilations. Here is where they will be posted. These will be compilations released by Canadian record labels or compilations that feature principally Canadian bands on them. Generally speaking, compilations here will be considered “a compilation representing something of Canada”.

This list is ever growing, so check back monthly! And if you have requests, please post them in the “reply” box below!
