Vision Éternel's EP "Abondance de périls" is now out

Abridged Pause Recordings introduces its two newest releases! Beyond the Dune Sea and Vision Éternel are now fully active artists on the Abridged Pause Recordings roster. We really hope that you will take a bit of your time to check them out because these bands have been hard at work lately and they deserve new ears. That's why we would also appreciate any word-of-mouth you can do for the bands and the label! Because without fans, the music industry would be nothing. Let's keep the indie scene alive! Vinyls should be coming on Abridged Pause Recordings this summer!

With a band like Vision Éternel now on board, we can start to brag. This band has only been getting better with each release and we're so happy to release their third EP on Abridged Pause Recordings. Vision Éternel were one of the original four bands signed to the record label back in 2008. It took them a couple years to finish up this record but it's finally out! Once again, this EP has a concept based on a break up story. We hope that you will all enjoy this beautiful masterpiece as much as we do.

"*Abondance de périls*" is Vision Éternel's new EP. As their third release, the band has moved to a newer sound, but still in keeping with the compositions it is known for. This splendid short play will be your soundtrack to late lonely nights and will make you feel just like the artist felt when writing these pieces. As usual for the band, it is a concept album. It is the third installment in the post-phases of love. For the first time, Vision Éternel has worked with external artists (in the mastering and the artwork of the album) and it adds an entire new dimension to this beautiful masterpiece.
